Windsock Tails...

Hello Everyone,

Welcome to the very first “**RNAC Windsock Tails**”...

Background...

It is a bit of an experiment, but the feedback from the recent Tiger restoration information emails has been really positive, so I thought I might continue on a more general basis.

Expected format...

- Basically a short email.
- Relevant RNAC / aeronautical subject matter.
- At least one photograph on the main page, no attachments.
- No club politics.
- One email every 3 to 5 weeks, or best effort.

I really hope everyone will find this information interesting, helpful and most of all relevant for your RNAC / aeronautical experience.

OK, enough of that, here we go...

Today’s topic is about the recently installed AWIS system at RNAC. **Automatic Weather Information System.**

Photos taken Sunday, 31st July 2016

Maitland AWIS web links...

Have a look at the links below similar information with different output format...

- <http://www.bom.gov.au/places/nsw/rutherford/observations/maitland-airport>
- <http://www.bom.gov.au/products/IDN60801/IDN60801.94650.shtml>

Just a new capability that gives a very accurate snapshot of the weather and weather trends for the nominated period.

I think it's great, and I would encourage everyone to become familiar with these sites.

Very kind regards, Trevor.

Director and Life Member.
